

SpaceWire Development Tools and Support Equipment

SpaceWire Working Group Meeting ESTEC July 2005

> Steve Parkes STAR-Dundee Ltd

STAR-Dundee SpaceWire-PCI-2

STAR-Dundee SpaceWire Router-USB

USB 2.0 Link 9 STAR-Dundee **SpaceWire Router-USB** Power +5V DC CE

* STAR-Dundee SpaceWire Drivers

- SpaceWire Router-USB and Brick

 Linux
 - Windows (2000, XP)
- SpaceWire PCI-2 and cPCI
 - Windows (98, 2000, XP)
 - VxWorks
 - Pentium
 - PPC 750
 - Linux under development

* STAR-Dundee SpaceWire Test Software

- Validation software
 - Simple packet transmit and receive
 - Configuration of routers
 - Sending and receiving of test packets
 - Time-code transmit and receive
- PETRI software
 - Aimed at testing user equipment
 - Send commands, receive response
 - Commands defined in text file
 - When to receive defined in the text file
 - Run from command line
 - Responses put in text file
- Example application source code

Some typical PETRI Commands:

```
S A:65 D:10 2E F8;
R L:3;
S A:65 D:99 99 00 0B;
S A:65 D:00 4C;
R L:5;
R L:100;
```

- Send a three byte packet to to SpaceWire address 65
- Receive a packet of length 3 bytes
- Send two more packets to address 65 (4 bytes, then 2 bytes)
- Receive two more packets (5 bytes, then 100 bytes)

STAR-Dundee PETRI Responses

- Each Receive Command results in an entry in the log being made.
- Example Responses:

F 93 4E 26 EOP F 73 65 32 0A 5B EOP F 6C 00 5A 85 6D B1 EOP

- A full packet was received, containing 3 bytes and terminated by an EOP marker
- A full packet was received, containing 5 bytes and terminated by an EOP marker
- A full packet was received, containing 6 bytes and terminated by an EOP marker

STAR-Dundee SpaceWire Monitor

STAR-Dundee SpaceWire Link Analyser

- GUI specifically for SpaceWire
- Monitors traffic on link
- Triggers on specific SpaceWire events
- Or sequence of events
- Captures and displays SpaceWire events
- Oscilloscope or Logic Analyser
- Fault injection

Products shipping now - SpaceWire Router-USB - SpaceWire USB Brick - SpaceWire Monitor - SpaceWire Link Analyser - SpaceWire PCI 2 - SpaceWire cPCI CE/FCC certification

Products shipping with

 Validation Software (USB & PCI)
 PETRI Software (USB only)
 Example Application in Source Code

 Applications Support

Coming soon
 – SpaceWire Conformance Tester
 – SpaceWire IP Tunnel
 – Remote Memory Access Protocol

Support for users of SpaceWire - Test equipment - Test software - Software drivers Development support IP support - ASIC support

Department of Applied Computing

- SpaceWire CODEC
  - Configurable VHDL core
  - Suitable for ASIC and FPGA implementation
  - IP licence available from ESA or UoD
- SpaceWire Router
  - Configurable VHDL Router
  - Generics for
    - Number of SpaceWire Ports
    - Number of External Ports
  - IP licence from University of Dundee
