

# SpaceFibre Architecture

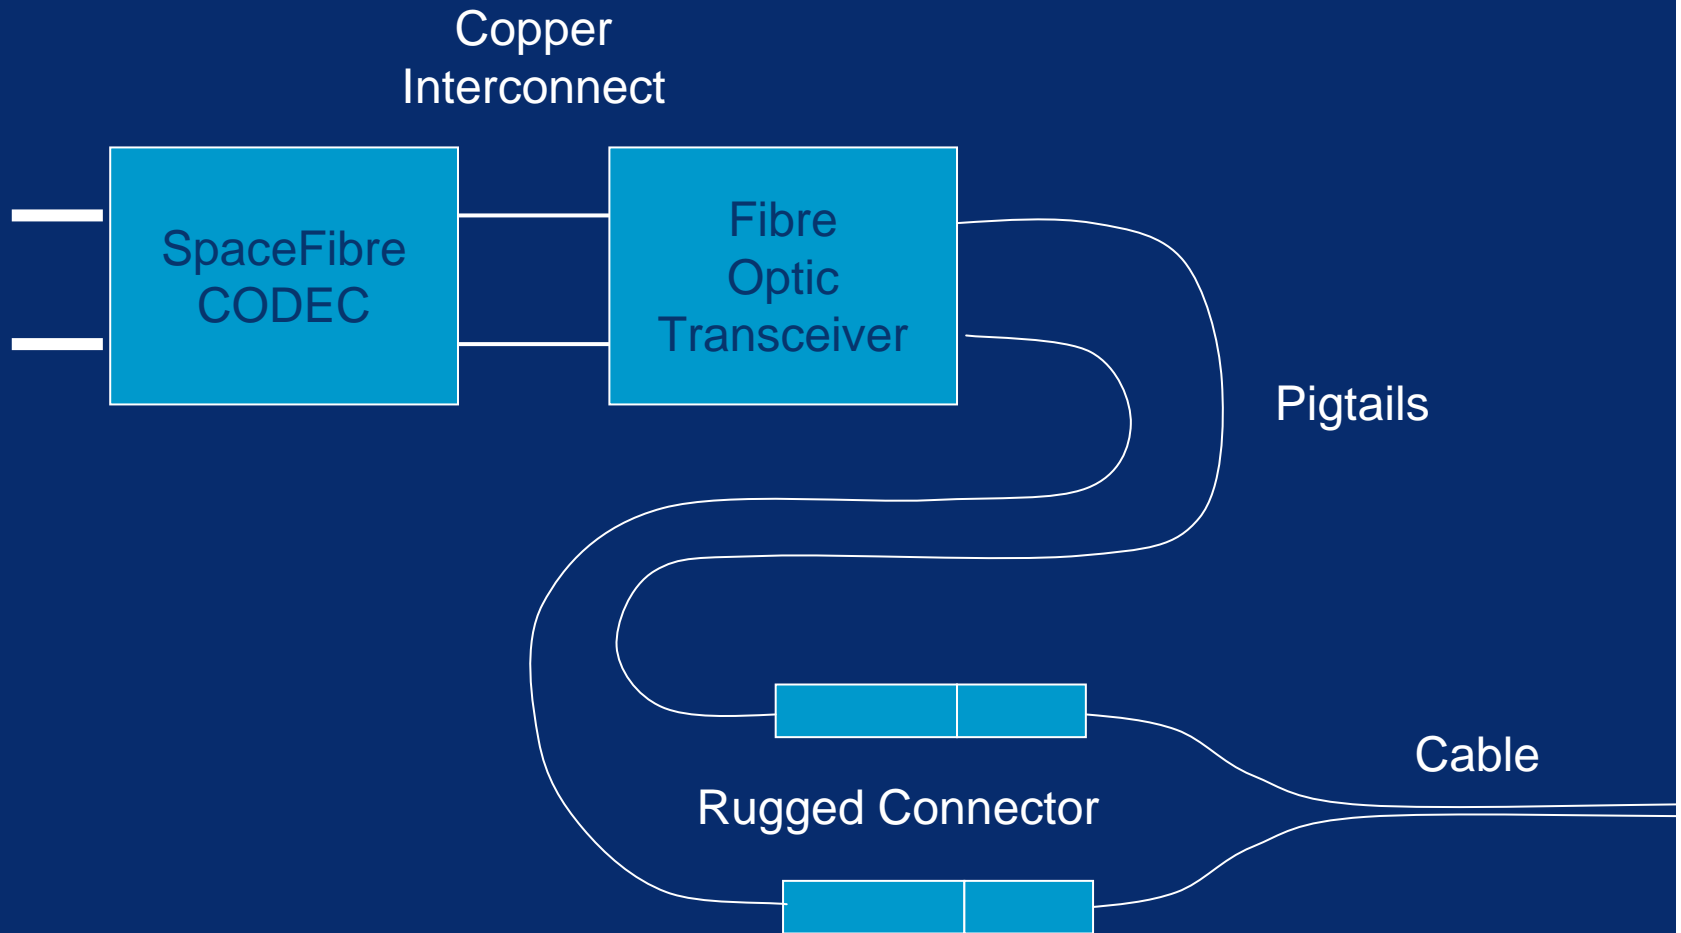

Steve Parkes, Martin Suess

Space Technology Centre  
University of Dundee

Space  
Technology  
Centre  
University of Dundee

# Overall Architecture

Space  
Technology  
Centre  
University of Dundee

# Requirements

- High data rate
  - 2.5 G bits/s plus
  - Over fibre and copper
- Fibre optic communications
  - 100 m plus
- Copper
  - Short length (1m)
- Galvanically isolated
- Light weight cables
- Low power per Gbit/s
- Radiation tolerant
- Rugged
- Able to integrate with SpaceWire network

## R&D Team

- University of Dundee - CODEC
- Patria Finavitec Oy
- VTT - Transceiver
- INO - Fibre
- Fibre Pulse - Connectors
- Gore – Cable
  
- ESA study managers
  - Martin Suess
  - Iain MacKenzie

Space  
Technology  
Centre  
University of Dundee

# Key Problems

- **Fibre**
  - Blackening due to radiation
  - Robustness
- **Transceiver**
  - Radiation tolerance components
  - 2.5 Gbits/s plus
  - Rugged
- **Connectors**
  - Rugged
  - Materials
- **CODEC**
  - 2.5 Gbits/s plus
  - Transferable to radiation tolerant technologies

Space  
Technology  
Centre  
University of Dundee

## Current Status

- Radiation tolerant fibre
- Rugged cable
- Rugged connectors
- Radiation tolerant transceiver
- Prototype CODEC
  - Still in research phase

Space  
Technology  
Centre  
University of Dundee

# SpaceFibre Transceiver

- Implemented in Xilinx Virtex II
- Using Rocket IO
- Also implemented in VHDL
- Tested one implementation against the other
- Demonstration shows operation over
  - Fibre
  - Copper
